Technical Skills

Programming Languages: Javascript, SQL, Typescript, Go, Java, C#, PHP, C, C++, Python, Lua

Framework: React.js, Express.js, Next.js, Laravel, Tensorflow, .NET, Node.js

Tools & Technologies: Git, MySQL, PostgreSQL, Firebase, SQL Server, Redis, Docker

Experience

Software Engineer in Test, Intern

February 2025 - February 2026

Kawan Lama Group

Jakarta, Indonesia

- Designed and managed detailed test cases, test scenario, and defect report using **Jira and Testmo**.
- Assisted in validating APIs, databases, and application workflows using tools such as **PgAdmin and Excel**.
- Improved understanding of **software development lifecycle (SDLC)**, testing methodologies, and **agile** collaboration practices in a large-scale enterprise environment.
- Formulated and maintained **automation testing** scripts using **Playwright** to improve testing efficiency.

Software Engineer, Backend

January 2025 - February 2026

Freelance

Jakarta, Indonesia

- Developed and maintained backend services for a facility reporting and management system using **Express.js** and **Firebase**.
- Created and implemented **RESTful APIs** for report management, user authentication, dashboard analytics, and **multi-tenant subdomain support**.
- Contributed to **BLE (Bluetooth Low Energy)** integration and **Web Bluetooth API** communication for automated area detection features.
- Integrated backend services with frontend applications built using **React and Progressive Web Application (PWA)** architecture.
- Utilized **GitHub** for version control and team collaboration, including branch management, code integration.

Student Mentor

September 2024 - February 2025

Binus University

Jakarta, Indonesia

- Taught Computer Science students with college class including **Object Oriented Programming(OOP)**, **Java**, **Database**, **SQL**, **Operating System**, **C**, **C++**, **Laravel**, **PHP**, **Algorithm and Design Analysis**, **MySQL**.

Software Engineer, Fullstack

January 2024 - February 2025

Freelance

Jakarta, Indonesia

- Programmed a Windows desktop application as a final project for a Desktop System Development course
- Produced and implemented the full application architecture using **C#** and **ASP.NET** in Visual Studio
- Applied **Object-Oriented Programming (OOP)** principles to ensure a clean and maintainable codebase
- Built a full-stack web application using the **Laravel 11 MVC** framework as part of a Web Programming course and **MySQL** as database
- Styled responsive UI components using **Tailwind CSS** for a modern and clean user interface

Game Script Developer

December 2021 - January 2024

Freelance

Jakarta, Indonesia

- Developed **custom automation** and gameplay enhancement scripts for the game Growtopia using **Lua**.
- Managed distribution and customer support for digital script products, successfully serving **50+ users**.
- Handled **version updates** and compatibility adjustments following in-game changes and patches
- Demonstrated entrepreneurial skills by independently marketing and selling scripts to an active gaming community.

Achievements

1st Place - Competitive Programming HIMFEST by HIMTI	July 2024
Scholarship Student Mentor	September 2024 - February 2025

Education

Binus University (GPA 3.79)	Jakarta, Indonesia
<i>Bachelor's in Computer Science (Streaming Software Engineering)</i>
